To HR Manager

Dear HR Manager,

I am thrilled to apply for the Full Stack Web Developer position at your esteemed company. My name is Haris Wahyudi and I am currently pursuing my Bachelor's Degree in Computer Science at Asia Cyber University (UNSLA).

Having worked as a Website Developer, I possess a strong grasp of various technologies such as ReactJS, ExpressJS, TailwindCSS, NodeJS, Laravel, React Native, AWS, and Git. My passion for coding drives me to consistently learn and enhance my skills.

I am currently enrolled in a part-time employee class, which allows me to balance my education while still focusing on my career. Through my studies, I have gained a well-rounded understanding of the industry and have developed a strong foundation in the field. I am confident that my skills and experience make me a valuable asset to your team.

I am enthusiastic about the opportunity to further discuss my qualifications in an online interview session. Thank you for considering my application.

Best Regards,

Haris Wahyudi

PROFILE

As an experienced software engineer with a focus on front-end development using React and back-end development with PHP Laravel and Express, I possess a wealth of knowledge in the field of web development. With 2 years of experience under my belt, I have honed my skills in utilizing MongoDB and MySQL to develop responsive, efficient and user-friendly web applications.

My ability to work collaboratively with a team, along with my keen attention to detail, has enabled me to deliver high-quality work while meeting project deadlines. I possess a passion for staying up-to-date with the latest technologies and trends in web development, ensuring that my skills remain relevant and cutting-edge.

Through my work experience, I have developed a strong understanding of software engineering principles, including project management, testing, and quality assurance. I have also gained valuable experience in working with cross-functional teams, providing me with the ability to communicate effectively with both technical and non-technical stakeholders.

In summary, I am a motivated and skilled software engineer with a focus on front-end and back-end development. My experience in utilizing React, PHP Laravel, and Express, as well as my proficiency in working with MongoDB and MySQL, makes me a valuable addition to any team. I am committed to continuously improving my skills and contributing to the success of the projects I work on.

EMPLOYMENT HISTORY

Feb 2022 — Present

Fullstack Web Developer, Sustainable Living Lab

Medan

- Conducted comprehensive planning and analysis to determine project scope, requirements, and deliverables, resulting in well-structured and scalable web applications that meet client specifications.
- Successfully provided troubleshooting and remediation for web applications, ensuring optimal performance and minimizing client downtime.
- Collaborated with cross-functional teams to ensure successful project delivery, including developers, Product Owners, designers, product managers, and QA engineers.
- Maintenance application to streamline company operations, resulting in increased efficiency and productivity.
- Conducted rigorous testing and quality assurance procedures to identify and resolve any issues, ensuring that web applications are free from errors, bugs, and security vulnerabilities.
- Implemented end-to-end testing using Cypress to ensure the quality and reliability of web applications, including functional testing, UI testing, and integration testing.
