Dear HR Manager,

I am very happy to send this because I want to apply as a Full Stack Web Developer in your company.

My name is Haris Wahyudi, Undergraduate but now I am pursuing my Bachelor's Degree in Computer Science.

I continue studying at Asia Cyber University (UNSI), I took employee classes and fully online classes so that they can focus on my career.

I have some experience as a Website Developer. I am familiar with Frontend technology like ReactJS, ExpressJS, TailwindCSS, Backend technology like NodeJS, ExpressJS, Laravel, Mobile Technology like React native, and some supporting technologies like AWS, or Git.

I am very happy to learn new technology because my hobby is code. By the way, I'm very passionate about this position.

I look forward to communicating with you at the online interview session to further discuss my qualifications and how I will be an asset to your company.

HARIS WAHYUDI

Full Stack Web Developer

PROFILE

My web career started in vocational high school where I majored in software engineering, I started learning to code from HTML, CSS, js, and PHP. In the final project of my vocational high school, I made an online new student admission application using Laravel. Besides learning coding at school, I also learn independently about SEO and creating a website using blogger and WordPress. I am focused to learn about Full Stack Web Developer.

Next, after graduating from vocational high school I continued to study programming at Arkademy. at Arkademy I studied technology in website development such as node, react, next, and react-native..

I Have 2 Years of Experience in website development. Experienced Web Developer is adept in all stages of advanced web development. Knowledgeable in a user interface, testing, and debugging processes.
